

# CMPSC 480

Software Innovation 1

# Teams for today's assignment

Table A            Scenario 2

Jacob, Enpu, Chris Stephenson, Chris Cook, Cathlin

Table B            Scenario 3

Jonathan, Rafael, Lancaster, Megan, Issac

Table C            Scenario 1

Sweta, Elisia, Alex, Devin, Jordan

Table D            Scenario 4

Caden, Matthew, Marisol, Xingbang, Adam

# Ethics vs. Morals

	Ethics	Morals
Definition	Rules of conduct which apply to cultural, professional, social groups.	Concepts of “right” and “wrong”; pertain to a specific individual’s world view.
Source	Socially derived (often professionally codified)	Individually derived
Reasoning	“Society says we should do it.”	“I believe it is right or wrong.”
Context	Often vary between professional, social, or cultural contexts.	Often absolute or consistent across all situations.
Mutability	Often easy or of moderate difficulty to change; responds to changing professional practice, landscape, or technologies.	Difficult to change; often requires an individual to reassess core personal beliefs.

# Group assignment

- Choose someone in your group to be a **Scribe**.
  - This person will accept the GitHub assignment link *first*
  - They will also create a group with their table name (see front board).
- Then, other students in the group should accept the assignment and join the correct team.
- Briefly read the scenario assigned to your team.
  - Assign roles specified in the assignment document.
  - Discuss and answer the questions listed at the bottom of the file.
